

# WACHIRAWIT THONGKAEW

Senior QA Engineer

Email: wachirawit.th@ku.th • LinkedIn: <https://www.linkedin.com/in/wachirawit-thongkaew/> • Phone: 0982705677

## Summary

Senior QA Engineer with a strong background across the Fintech and Banking sectors. Expert in designing and executing end-to-end automated and manual testing strategies to ensure product quality and reliability for high-performance financial platforms. Focused on driving testing innovation and enhancing frameworks within Agile environments to support rapid software delivery and robust system stability.

## Highlights

|                                                                   |                                                                                                    |                                                                                             |                                                                                                               |
|-------------------------------------------------------------------|----------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------|
| ✓ <b>Test Suite Optimization</b>                                  | ✓ <b>Team Mentorship</b>                                                                           | ✓ <b>AI Adoption</b>                                                                        | ✓ <b>Production Investigation</b>                                                                             |
| Reduced test suite execution time, increasing overall efficiency. | Improved QA automation by enhancing function logic efficiency, reducing regression execution time. | Leveraged AI to generate test scripts and test scenarios, accelerating automation coverage. | Collaborated with support teams to investigate production issues, performing RCA to resolve critical defects. |

## Experience

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                   |
