

WACHIRAWIT THONGKAEW

Senior QA Engineer

Email: wachirawit.th@ku.th • LinkedIn: <https://www.linkedin.com/in/wachirawit-thongkaew/> • Phone: 0982705677

Summary

Senior QA Engineer with a strong background across the Fintech and Banking sectors. Expert in designing and executing end-to-end automated and manual testing strategies to ensure product quality and reliability for high-performance financial platforms. Focused on driving testing innovation and enhancing frameworks within Agile environments to support rapid software delivery and robust system stability.

Experience

LSEG (London Stock Exchange Group)

11/2022 - Present

Senior QA Engineer

- Established test automation best practices and coding standards for the QA team, reducing defect escape rate before production deployment.
- Optimized automation test suite by consolidating redundant cases and refining execution logic, reducing overall regression run time by 50%.
- Built JMeter load testing scripts to stress-test RESTful APIs under concurrent traffic, identifying performance bottlenecks before production.
- Enforced zero-defect deployment standards by integrating Selenium/Playwright E2E quality gates into GitLab CI/CD, blocking non-compliant merges automatically.
- Extended test coverage to cloud infrastructure by validating serverless workflows and data integrity checks across critical cloud-dependent processes.
- Implemented Behavior-Driven Development (BDD) using Gherkin and Cucumber to align tests with business requirements and standardize feature documentation.

Zipmex Pte. Ltd

11/2021 - 11/2022

Software Quality Engineer

- Validated end-to-end UI flows for ZipCard, a crypto-backed Visa debit card, using Cypress and Playwright to ensure payment accuracy and transaction reliability.
- Collaborated with international teams to perform Root Cause Analysis (RCA) on production issues.

MAQE Bangkok Co., Ltd

07/2020 - 10/2021

QA Automation Engineer

- Led end-to-end QA for Com7's BananaIT (BNN) eCommerce platform migration from Magento to a custom-built solution across web and mobile (iOS/Android) using Cypress.
- Validated UI/UX implementation against Figma prototypes and stress-tested the BNN platform under high-traffic retail conditions using k6.

Ascend Corporation

10/2019 - 06/2020

Quality Assurance Engineer

- Designed and prioritized test cases in Agile sprints for WeFresh, a grocery delivery platform integrating 7-Eleven, CP Freshmart, and Tesco Lotus Express into a single app.
- Built UI test coverage with Cypress to validate cart, checkout, and partner store integrations across the WeFresh platform.
- Investigated production issues on WeFresh, collaborating with support teams to perform Root Cause Analysis (RCA) and resolve live customer-impacting defects.

Aware Technology

03/2019 - 11/2019

Associate Software Test Engineer Automation

- Built mobile test coverage for myAIS (AIS's all-in-one customer app) using Appium on Android, converting over 100 manual cases into a reusable regression suite.
- Maintained and debugged Selenium and Appium scripts across mobile and web to ensure stability of core myAIS features through each release cycle.

Education

Kasetsart University

01/2015 - 01/2019

Bachelor of Science in Computer Science

Skills

Advanced: Selenium · Cypress · Playwright · Postman/REST API · Cucumber
Intermediate: SQL Script · Redis Command · Appium · Robot Framework · k6 · JMeter · Jenkins · GitHub Actions
